

Client Scheduling – Case Studies

Client

A healthcare organization situated in the United States of America.

The Task

The client needed a scheduler to maintain schedules for various facilities, as the organization schedules appointments for various facilities than for providers.

The Solution

Binary Spectrum developed and deployed a scheduler for the client which was customized with a few features like reports and scheduling private events, as per the client's requirements.

The Result

Client is extensively using our scheduler, overwhelmed with the available features and ease of use as it allows the client to quickly configure schedules for various facilities and book appointments for patients.

Tools and Technology

DotNet - Crystal reports for extreme reporting features.

Sql server as backend.
